

Dear Colleague,

The following is the preliminary agenda for the Neurosurgery Special Interest Group meeting:

- 07:00 Welcome and follow-up on previous meeting minutes
- 07:10 *Directional steering: A novel tool for deep brain stimulation*  
Maria Fiorella Contarino MD PhD
- 07:25 *Directional DBS improves the therapeutic window: From model prediction to human use*  
Claudio Pollo MD PhD
- 07:40 Review of suggested topics and speakers for symposia, parallel and teaching sessions  
for the Movement Disorder Society meeting in San Diego in 2015
- 08:00 Adjourn

Please find attached a collated list of suggested topics for future NSIG meetings that have been submitted by attendees of this meeting. Kindly review the list and mark the three (3) topics that you are most interested in. These choices will form the basis of the NSIG meeting to be held in San Diego in 2015.

Sincerely,

A handwritten signature in black ink, appearing to read "Per Almqvist", written over a horizontal line.

Per Almqvist MD, PhD, Chair Neurosurgery SIG
