

Terms of Reference

Neurosurgery Special Interest Group of the Movement Disorders Society 2015

1, To act as a hub to bring together and engage the neurologists, neurosurgeons and other health professionals with interest in the surgical management of patients with movement disorders.

2, To promote neurosurgical content and suggest neurosurgical sessions/ topics for the forthcoming meetings of the Movement Disorders Society (MDS) to the Congress Scientific Planning Committee.

3, To promote and encourage membership of the MDS amongst neurosurgeons.

4, To encourage neurosurgeons to participate in the many courses already run by the MDS and also contribute to development of future courses.

5, To identify areas of unmet clinical needs in the neurosurgical management of patients with movement disorders and actively aim to address these eg patient information sheets for surgery, complications scales and as such.

6, To develop relationship and collaborations with other societies with overlapping interests such as the World Society of Stereotactic and Functional Neurosurgery and the European Society of Stereotactic and Functional Neurosurgery.
